### DEVELOPMENT EXPERIENCE

---

#### Full Stack Software Development Student

CodeWorks | January 2019 - April 2019

- Completed 500+ hours of hands-on coding time, completing over 20 projects in 13-weeks
- **Scrumpossible** - created a full-stack application through collaboration with one other partner. The project was designed to assist in planning and strategizing Scrum sprints. Includes user authentication, private projects, and shared projects.
- **LoanShark** - A collaboration project built with a team of 3 developers. It is a full-stack application that allows users to track items lent or borrowed and develop terms and agreements at the initiation of a deal. Incorporates and user authentication.

### EDUCATION

---

#### Certificate of Completion

CodeWorks (2019)

-Full-Stack Immersive Program

#### B.A. Psychology,

California State University San Marcos  
(2015)

### PROFESSIONAL SUMMARY

---

A Full Stack Software Developer experienced in building applications from start to finish utilizing multiple front and back-end languages. Comfortable collaborating with peers to design projects meeting strict deadlines. Passionate about solving problems and delivering user friendly applications. Seeking an opportunity utilizing the latest technologies and building customer focused applications.
